Oct 2014

# SOFTWARE-DEFINED TRANSFORMATION OF IT

## Data Center

Driven by server virtualization

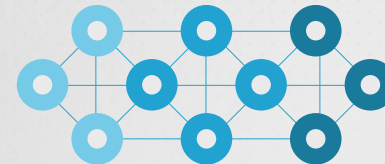

SDN Apps  
Virtual Network

DC LAN Physical  
Connectivity

## Enterprise WAN

Driven by hybrid cloud

SDN Apps  
Virtual Network

Branch Office Physical  
Connectivity

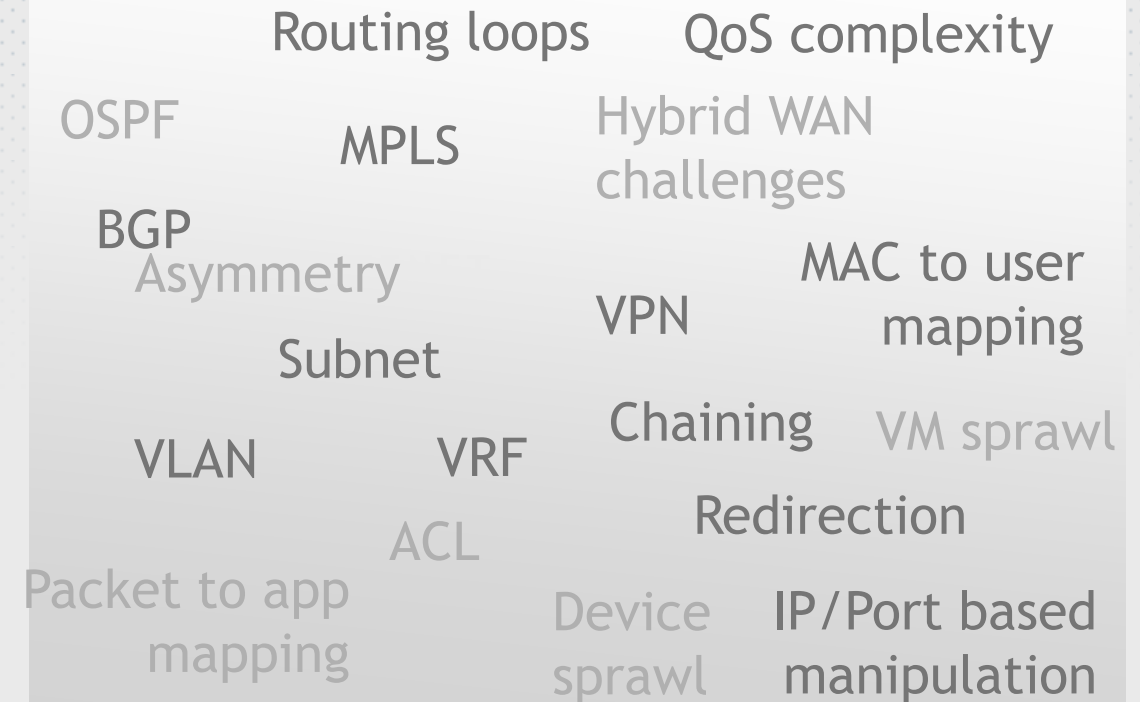

# INCUMBENT SOLUTIONS FALL SHORT

Infrastructure sprawl, complexity, rigidity

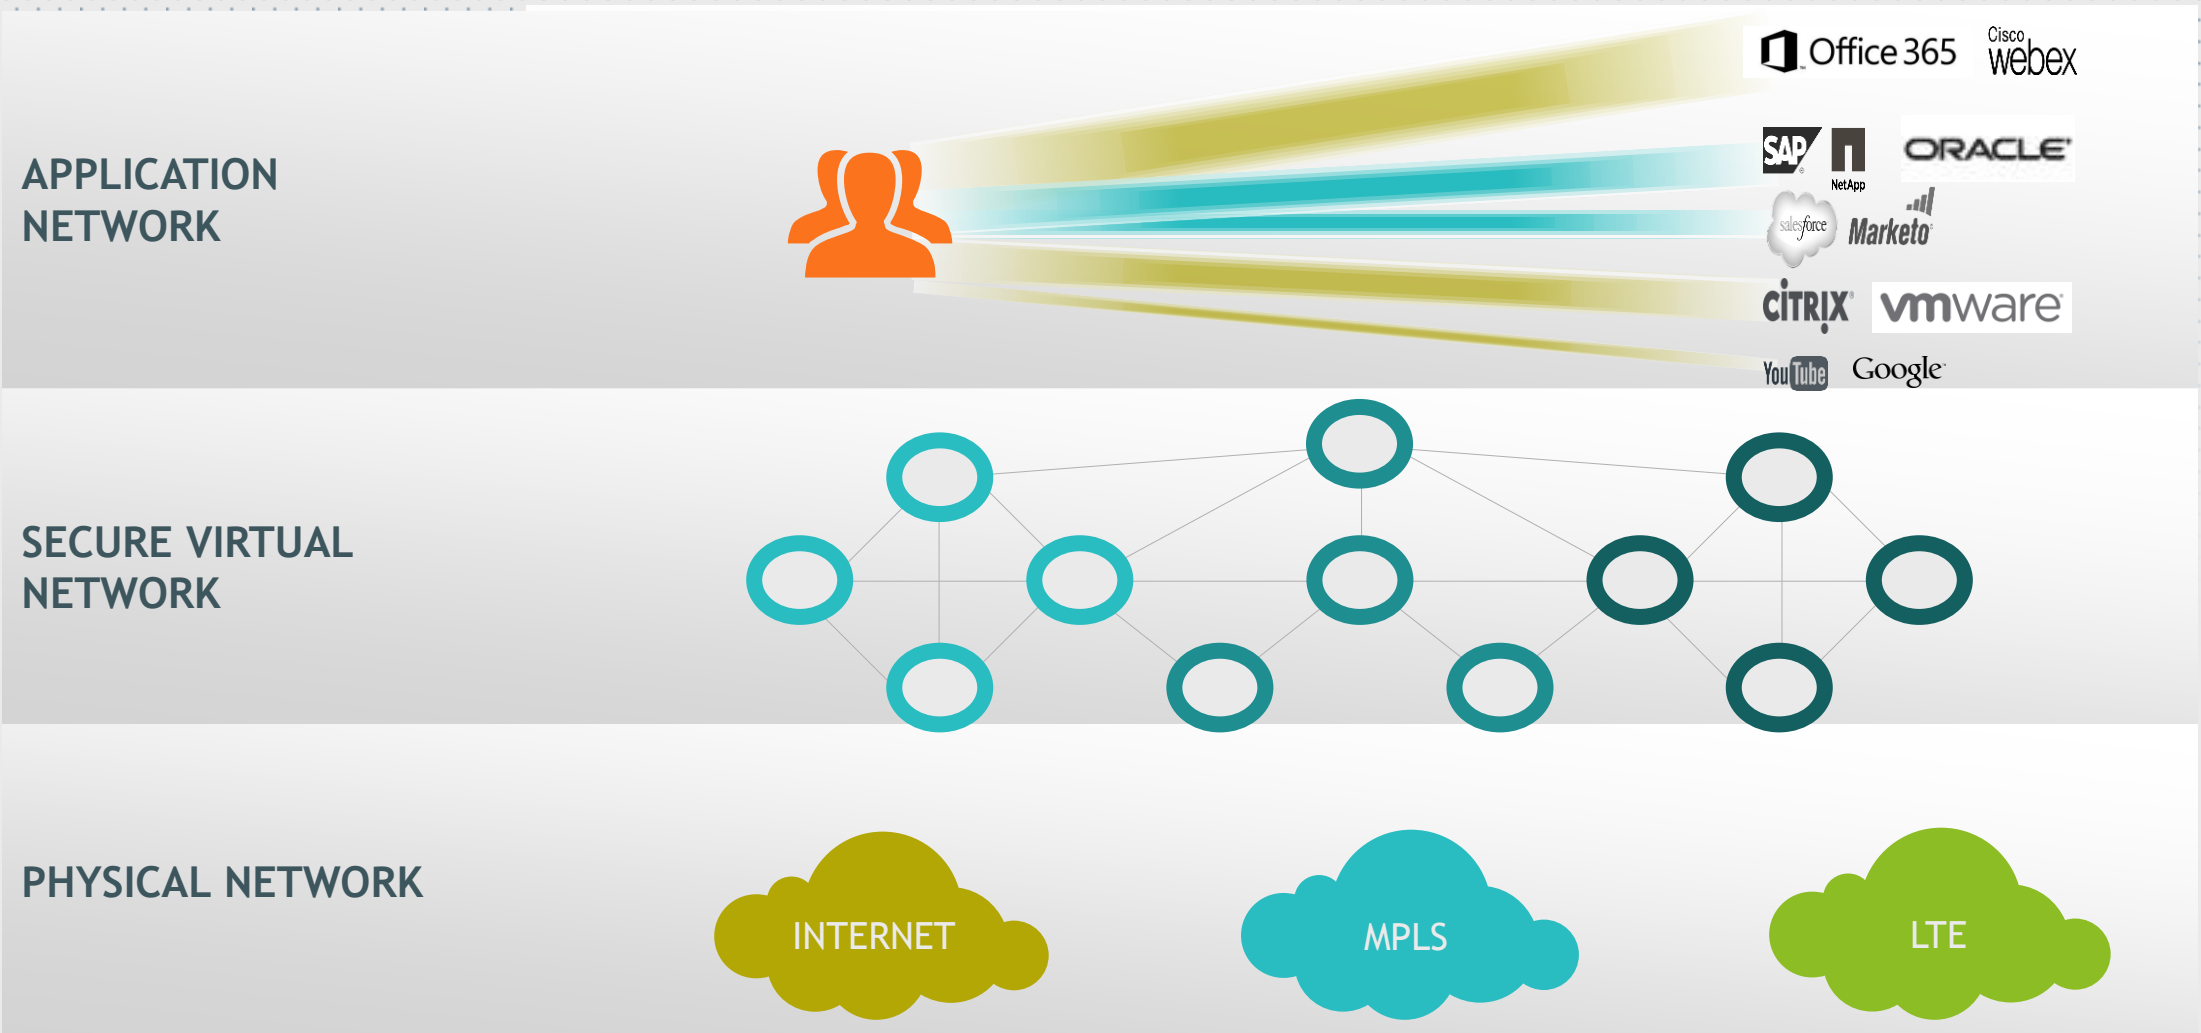

## Remote Office Infra

## Networking Complexity

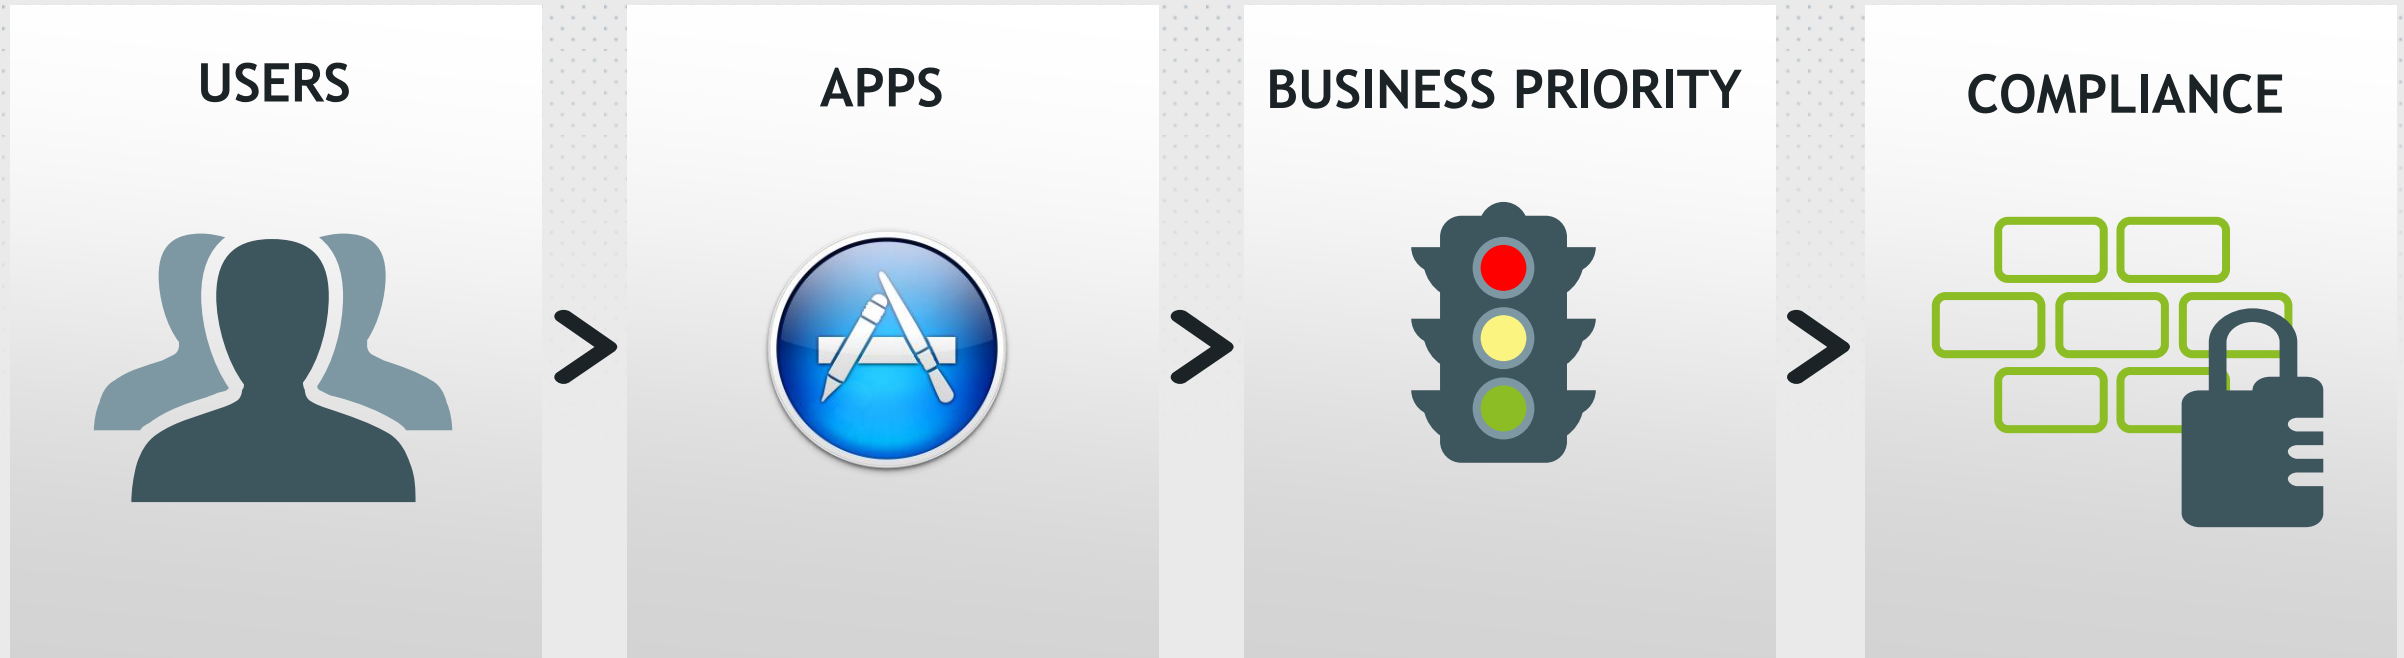

# CLOUDGENIX SOFTWARE DEFINED WAN

# REVOLUTIONIZING NETWORKING [SDEwan]

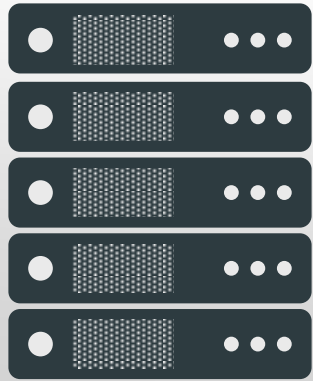

Business policy defined

---

# TRANSFORMING CUSTOMER WANs

## Complex Remote Office Infra

Management

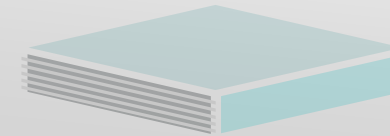

Security

Performance

Visibility

Hybrid app routing

## Lean Remote Office

Centralized Network Functions

## Connecting Locations

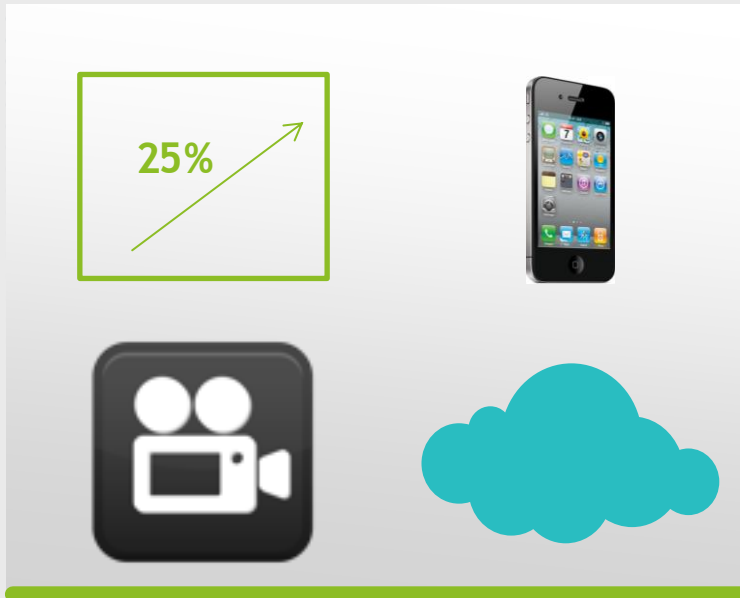

Routing loops      QoS complexity  
OSPF      MPLS      Hybrid WAN challenges  
BGP      Asymmetry      VPN      MAC to user mapping  
Subnet      Chaining      VM sprawl  
VLAN      VRF      Redirection  
ACL      Device sprawl      IP/Port based manipulation  
Packet to app mapping

## Connecting Hybrid Apps & Users

# BUSINESS CASE AT A LARGE ENTERPRISE

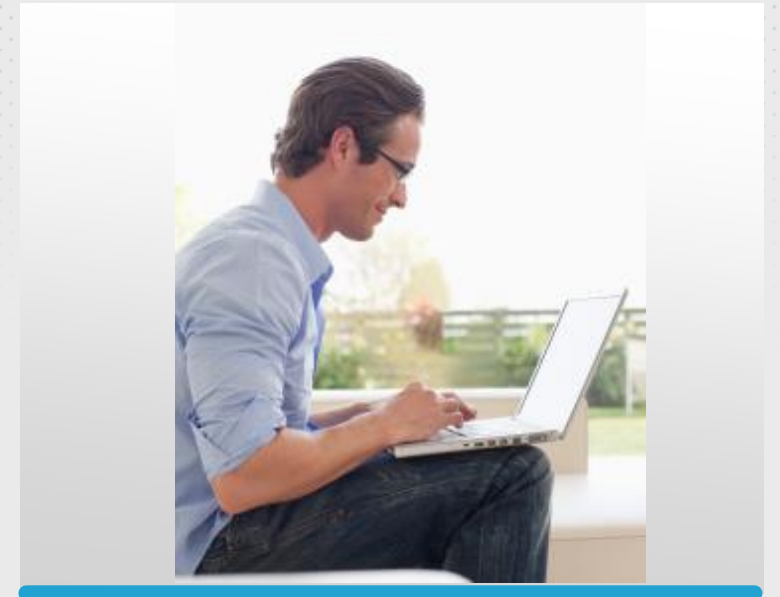

Grow The Business

\$100M WAN Savings

\$125M+ Opex Savings
